Frontend

- React.js
- HTML, CSS, JavaScript
- Bootstrap, jQuery, Ajax

Programming Languages

- C#
- JavaScript

Other

- Docker
- Data Structures & Algorithms
- Microservices
- Git

Soft Skills

- Cross-functional collaboration
- Time management
- Effective remote working
- Multi-project handling
- Flexible time allocation
- Workflow optimization

Work Experience

Ocean Consulting and Training Co., Ltd.

Position: Technical Intern

Duration: 3 months

Hardware

- Directly assembled, inspected, and maintained computer hardware components.

Software

- Installed operating systems, configured, and troubleshoot specialized application software.

Network Systems

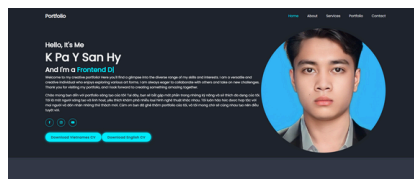

- Deployed internal network infrastructure: cable crimping, wiring, and device installation.
- Configured basic network devices (routers, switches) to ensure stable connectivity.

Technical Support

- Diagnosed and resolved hardware conflicts and network connectivity issues for end users in a timely manner.

PROJECTS

PERSONAL PORTFOLIO WEBSITE

DESCRIPTION:

- “Introduction” is a personal portfolio website designed to showcase my creative and development skills as a versatile designer and developer.

Link: <https://sanhhy02.github.io/Introduction/>

Technologies Used:

- Frontend: HTML5, CSS, JavaScript

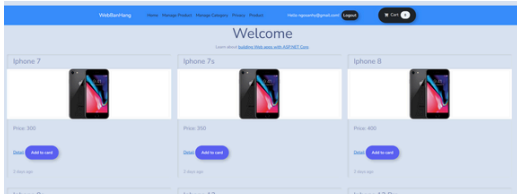

Development Tools:

- Visual Studio Code
- Git & GitHub

Key Features:

- Fully responsive interface adaptable to all screen sizes
- Dynamic portfolio section showcasing artwork, web/app projects, and branding/UI-UX work through an interactive gallery with hover effects and lightbox
- Smooth animations and user interactions implemented using JavaScript

E-COMMERCE WEBSITE (WEBBANHANG – ASP.NET)

DESCRIPTION:

- WebBanHang is a fully functional e-commerce web application developed as part of an Advanced ASP.NET course. The system allows users to browse products, register/login, add items to a cart, place orders, and complete basic checkout processes.

Link: <https://github.com/sanhy02/ASPNgCao/tree/master/WebBanHang>.

Key Features:

User Side

- Homepage with featured product slider and categories
- Product search and filtering by category and price
- Product detail pages with images, descriptions, and add-to-cart functionality
- User registration and login
- Dynamic shopping cart
- Order placement and confirmation workflow

Admin Panel

- Separate admin login
- Category management
- Product management
- Order monitoring and processing
- User management

Basic Security

- Parameterized queries to prevent SQL Injection
- Input validation

LARAVEL NEWS WEBSITE PROJECT

Description:

A full-stack news website built using the Laravel framework.

Link: <https://github.com/sanhy02/prj00>

Technologies Used:

- **Backend:** PHP (Laravel Framework)
- **Frontend:** Templating: Blade
- **Database:** SQL
- **Tools:** Visual Studio Code, Git/GitHub, Artisan CLI

Key Features:

- Database management using migrations and seeders
- Authentication & authorization (user registration and login)
- Optimization & security using parameterized queries, validation, middleware, and Laravel best practices
